

ANIMAL CREATORS

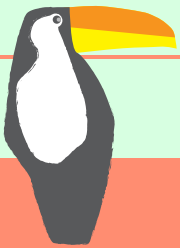

CONGRATULATIONS, YEAR THREE DESIGNERS, ON BEING SELECTED TO CREATE A BRAND NEW ANIMAL TO LIVE IN OUR WORLD. READ BELOW TO FIND OUT MORE ABOUT YOUR MISSION.

BE CAREFUL... AND GOOD LUCK!

HABITAT

Your animal must be fit to live in the Amazon Rainforest, one of the deadliest environments in the world. It runs through South America and in it lies dangerous, and beautiful, creatures such as... poison dart frogs, jaguars, toucans and monkeys. Your new animal must thrive and survive in the Amazon Rainforest.

SPECIAL FEATURES

What special features will your animal have? Remember that your animal will be faced with threats in the rainforest. What will help it stay safe? Think about observable features you could give your animal. Will your animal live on land, in the canopy, or in the water? Remember to create features that help the animals in their habitat.

WHAT DO I DO NEXT?

First you have some time to research the Amazon rainforest, before you brainstorm for your animal. You will be given time to create a diagram where you label features of your animal and explain the features. In English you will write a report before painting your animal in Art.
